Preface vii

Introduction viii

In memory of Günther Harbeke x

Contents xiii

Chapter 1. General reviews: hydrogen in and on semiconductors

Hydrogen in crystalline semiconductors
N.M. Johnson, C. Doland, F. Ponce, J. Walker and G. Anderson 3

Theoretical aspects of hydrogen in crystalline semiconductors
C.H. Van de Walle 21

Electronic structure, dynamics, and metastability of muonium in semiconductors
R.F. Kiefl and T.L. Estle 33

Electronic and structural properties of hydrogen on semiconductor surfaces
J.A. Schaefer 45

Hydrogen diffusion and electronic metastability in amorphous silicon
R.A. Street 69

Chapter 2. Hydrogen diffusion and effusion

Hydrogen diffusion in crystalline semiconductors
S.J. Pearton, J.W. Corbett and J.T. Borenstein 85

Hydrogen in crystalline and amorphous silicon
F. Buda, G.L. Chiarotti, R. Car and M. Parrinello 98

Hydrogen effusion: a probe for surface desorption and diffusion
W. Beyer 105

Hydrogen enhanced oxygen diffusion
R. Murray 115

Electrolytic hydrogenation of p-type silicon bulk and surface modifications
P. de Mierry, A. Etcheberry and M. Aucouturier 124

On the modeling of hydrogen diffusion processes and complex formation in p-type crystalline silicon
R. Rizk, P. de Mierry, D. Ballutaud, M. Aucouturier and D. Mathiot 129

Modeling of hydrogen diffusion in p-type GaAs:Zn
R. Rahbi, D. Mathiot, J. Chevallier, C. Grattepain and M. Razeghi 135

Modulation and thermal stability of hydrogen in amorphous silicon
M. Vergnat, S. Houssaini, G. Marchal and Ph. Mangin 141

The dispersive diffusion of hydrogen in undoped a-Si:H
X.-M. Tang, J. Weber, Y. Baer and F. Finger 146

Hydrogen evolution in amorphous silicon carbide
F. Demichelis, G. Crovini, C.F. Pirri, E. Tresso, E. Giamello and G. DellaMea 149

Chapter 3. Hydrogen related states and defects

Electron paramagnetic resonance of hydrogen in silicon
Yu.V. Gorelkinskii and N.N. Nevinnyi 155

Theory of H sites in undoped crystalline semiconductors
A.A. Bonapasta 168

Metastable states in Si:H
R. Jones 181

Hydrogen implantation in semiconductors
J. Tatarkiewicz 188

Hydrogen complexes in hydrogenated silicon
W.B. Jackson and S.B. Zhang 197

Defect generation during plasma treatment of semiconductors
J. Weber 201

Evidence for intrinsic point defect generation during hydrogen-plasma treatment of silicon
M. Singh, J. Weber and M. Konuma 218

Structure of the (1 1 1) hydrogen platelet in silicon
P. Deák, C.R. Ortiz, L.C. Snyder and J.W. Corbett 223

Optically detected nuclear magnetic resonance in amorphous silicon related materials
M. Kondo, H. Yokomichi and K. Morigaki 227

RF hydrogen plasma influence on shallow and deep levels in crystalline silicon
A. Szekeres, S.S. Simeonov and E. Kafedjiiska 231

Defects in H implanted GaAs studied by ion-beam and low-energy positron techniques
J. Keinonen, E. Rauhala, J. Räisänen, K. Saarinen, P. Hautojärvi and C. Corbel 235

States of hydrogen in crystalline silicon
M. Stutzmann, W. Beyer, L. Tapfer and C.P. Herrero 240

Infrared analysis of hydrogen in GaP
B. Dischler, F. Fuchs and H. Seelewind 245

The Si–H IR absorption bands in NTD FZ (H_2) Si and their identification
X.T. Meng 249

Hydrogen complexes and their vibrations in undoped crystalline silicon
P. Deák, L.C. Snyder, M. Heinrich, C.R. Ortiz and J.W. Corbett 253

Evidence for molecular hydrogen in single crystal silicon
L. Meda, G.F. Cerofolini, G. Ottaviani, R. Tonini, F. Corni, R. Balboni, M. Anderle, R. Canteri and R. Dierckx 259

Role of the hydrogen in the light-induced defects in undoped hydrogenated amorphous silicon
H. Labidi, K. Zellama, P. Germain, M. Astier, D. Lortigues, J.V. Bardeleben, M.L. Theye, L. Chahed and C. Godet 265

Hydrogen related effects in a-Si:H studied by photothermal deflection spectroscopy
J. Serra, J. Andreu, G. Sardin, C. Roch, J.M. Asensi, J. Bertomeu and J. Esteve 269

Low energy ion-beam post hydrogenation of phosphor implanted amorphous silicon films
R. Galloni, M. Ruth, A. Desalvo and Y.S. Tsuo 273

Slow structural transitions of hydrogen in hydrogenated amorphous silicon during low temperature annealing
A. Asano 277

Structural changes in a-Si:H during annealing
M.J. van den Boogaard, B.G.C. van der Ree, H. Meiling, R.E.I. Schropp and W.F. van der Weg 281

The effects of hydrogen dose and thermal treatment on the formation of microsplits in hydrogen implanted GaAs
J.H. Neethling 285

Chapter 4. Hydrogen complexes

Theory of hydrogen-impurity complexes in semiconductors
G.G. DeLeo 295

Nuclear magnetic resonance investigation of H, H_2 and dopants in hydrogenated amorphous silicon and related materials
J.B. Boyce and S.E. Ready 305

Investigation of cadmium–hydrogen complexes in silicon
M. Gebhard, N. Achtziger, A. Baurichter, D. Forkel, B. Vogt and W. Witthuhn 320

Structure and reorientation kinetics of hydrogen passivated shallow impurities in silicon from vibrational spectroscopy
M. Stavola 325

Investigation of hydrogen in semiconductors by nuclear techniques
M. Deicher, R. Keller, W. Pfeiffer, H. Skudlik and Th. Wichert 335

Electronic properties of hydrogen-related complexes in pure semiconductors
E.E. Haller 351

Light-enhanced reactivation of passivated boron in hydrogen treated silicon
T. Zundel, J. Weber and L. Tilly 361

Hydrogen in phosphorus- and carbon-doped crystalline silicon
A.L. Endrös, W. Krühler and J. Grabmaier 365

Vibrational properties of hydrogen in compound semiconductors
B. Pajot, B. Clerjaud and J. Chevallier 371

Unintentional hydrogen incorporation in crystals
B. Clerjaud 383

First-principles calculations of hydrogen in bulk GaAs
L. Pavesi and P. Giannozzi 392

Plasma-hydrogenated microwave and optoelectronic devices
Pr.E. Constant 397

The effects of anharmonicity on the vibrations of hydrogen impurity pairs in gallium arsenide
R.C. Newman 409

Localised vibrational modes of hydrogen–impurity complexes in GaAs
P.R. Briddon and R. Jones 413

Electronic level of hydrogen and thermal stability of hydrogen related complexes in GaAs
B. Clerjaud, F. Gendron, M. Krause, C. Naud and W. Ulrici 417

Hydrogen neutralization of dopant in p-type $Ga_{0.47}In_{0.53}As$
B. Theys, A. Jalil, J. Chevallier, A.M. Huber, C. Grattepain, P. Hirtz and B. Pajot 421

Chapter 5. Surfaces and interfaces

Hydrogen on semiconductor surfaces
C.M. Bertoni, F. Finocchi, F. Bernardini and M. Buongiorno Nardelli 429

Hydrogen chemisorption on cleavage faces of III–V compounds
S. Nannarone and L. Sorba 436

Infrared spectroscopy of hydrogen on silicon surfaces
Y.J. Chabal 447

Dissociation effects of H and H_2^+ on clean III–V compounds
F. Proix 457

Hydrogen at semiconductor grain boundaries and interfaces
M. Aucouturier 469

Hydrogen induced structure changes of GaAs(1 0 0) surfaces
Th. Allinger, J.A. Schaefer, Ch. Stuhlmann, U. Beckers and H. Ibach 481

HREELS investigation of the first stage of interaction of atomic hydrogen with GaAs(1 1 0) surfaces
U. del Pennino, C. Mariani, A. Amoddeo, F. Proix and C.A. Sébenne 487

Existence and thermal stability of mono and dihydride phases on Si(1 1 1) and Ge(1 1 1) surfaces
J.J. Koulmann, D. Steinmetz, F. Ringeisen and D. Bolmont 492

Hydrogen plasma treatment: desorption of atomic hydrogen from silicon surfaces studied by in-situ spectroscopic ellipsometry
P. Raynaud, J.P. Booth and C. Pomot 497

Hydrogen action in the surface space charge region of highly doped silicon
A. Akremi, J.P. Lacharme and C.A. Sébenne 503

Reversible H_2 passivation of $^{*}Si{=}Si_3$ interface defects in (1 1 1)Si/SiO_2
A. Stesmans and G. Van Gorp 507

Hydrogen plasma modification of metal/GaAs interface
Y.G. Wang and S. Ashok 513

The chemisorption of hydrogen on silicon and silicon carbide (1 0 0) surfaces
B.I. Craig and P.V. Smith 518

Surface passivation of boron doped a-Si:H
Z.-y. Wu, B. Equer, A. Lloret and R. Amokrane 523

Hydrogen pile-up at interfaces between differently doped layers of amorphous silicon
H.C. Neitzert, M.A. Briere and P. Lechner 529

Chapter 6. Hydrogen incorporation and defect passivation

Role of hydrogen atoms in anodized porous silicon
T. Ito, H. Kiyama, T. Yasumatsu, H. Watabe and A. Hiraki 535

A photoluminescence study of the effects of hydrogen on deep levels in MBE grown GaAlAs:Si
A. Bosacchi, S. Franchi, L. Vanzetti, P. Allegri, E. Grilli, M. Guzzi, R. Zamboni and L. Pavesi 540

Hydrogen passivation of vacancy-related centres in silicon
B.N. Mukashev, S.Z. Tokmoldin, M.F. Tamendarov and V.V. Frolov 545

Incorporation of hydrogen in CdTe and HgTe epitaxial layers grown by MOCVD
L. Svob, Y. Marfaing, F. Desjonqueres and R. Druilhe 550

Passivation of dislocations in silicon by hydrogenation
I. Perichaud, H. El Ghitani and S. Martinuzzi 553

Electroreflectance and photoluminescence measurement of passivation by hydrogenation in GaAs/AlGaAs structures
D. Yang, J.W. Garland, P.M. Raccah, C. Coluzza, P. Frankl, M. Capizzi, F. Chambers and G. Devane 557

Picosecond spectroscopy of hydrogenated MBE-GaAs
M. Capizzi, C. Coluzza, P. Frankl, A. Frova, M. Colocci, M. Gurioli, A. Vinattieri and R.N. Sacks 561

In situ study of the Si–H bond in a-Si:H ultrathin films
N. Blayo, P. Blom and B. Drevillon 566

Deposition of amorphous hydrogenated semiconductors by magnetron assisted silane decomposition
V.I. Marakhonov, N.A. Rogachev, E.I. Terukov, J.T. Ishkalov and I.N. Trapeznikova 571

Boron doped a-SiC_x:H films from $B(C_2H_5)_3/SiH_4$
G. Suchaneck, M. Albert and K. Schade 574
